**THE KINGDOM HOUSE**

Station Court, Pittenweem, Fife

The Kingdom House is Kingdom Housing Association's vision of a modern energy efficient home of the future, brought to fruition by Oliver & Robb Architects and built to Passive House standards by Campion Homes.

The inclusion of Solar Panels, PV Cells, Air Source Heat Pump, Mechanical Ventilation and Heat Recovery Units were complimented perfectly with a JUB Jubizol Facade System to produce a house with a negligible carbon footprint.

The Jubizol Facade System uses 160mm of Graphite XPS insulation to achieve a U Value of 0.19 and is finished with Jub NANOSIL 1.5mm

Jub Approved Applicator G&R Ross of Airdrie applied Jub's patented Self Cleaning, Highly Breathable, Silicone Render, Nanosil, which utilises Nano Technology to inhibit dirt pick-up and prevent staining. Perfect for a building like this, with a coastal location, a minimal roof projection and a large wall area.

Jub products are distributed in Scotland by Rowebb Ltd [www.rowebb.com](http://www.rowebb.com)
